

WHO WE ARE

Imprint Signs was founded in 2014 and originally operated out of a residential apartment in Pretoria, humble beginnings to say the least! Back then it was a one-man operation: outsourcing basically everything, providing graphic design and simple signage solutions to the public. The founder's 7 years of graphic design and large format printing experience, prior to starting Imprint Signs, came in handy however there were so many unknowns and calling it a scary time is an understatement. The philosophy then was "simply put your head down and do the work and the rewards will come!" Today that philosophy is still unchanged however, a lot has changed! We are extremely proud to have grown into a well established, highly recommended, reputable, industry leaders in design, all round printing and signage company. We use state of the art equipment and utilise a space that has its own design studio, print and work room, workshop and storage facilities right in the heart of Gauteng.

"Graphic design is the process of visual communication and problem-solving through the use of typography, photography, iconography and illustration. The field is considered a subset of visual communication and communication design, but sometimes the term "graphic design" is used synonymously. Graphic designers create and combine symbols, images and text to form visual representations of ideas and messages. They use typography, visual arts, and page layout techniques to create visual compositions. Common applications of graphic design include corporate design (logos and branding), editorial design (magazines, newspapers and books), wayfinding or environmental design, advertising, web design, communication design, product packaging, and signage."
